All references provided must be for work performed within the last three (3) calendar years.

11. **BRAND NAMES**

Manufacturer's names, trade names, brand names, or catalog numbers used in the specifications are for the purpose of describing and establishing the general quality level, design and/or performance desired. Such references are not intended to limit or restrict bidding by other vendors but are intended to establish the quality, design or performance characteristics desired. Any bid including like quality, quantity, design or performance characteristics will be considered.

12. **SUBSTITUTIONS**

Questions related to the specifications and/or drawings must be directed to the Procurement Officer Representative (POR) in writing. **Do not place the solicitation number on the outside of the envelope containing questions sent to the POR as the envelope may be identified as a sealed bid and not opened until after the official due date/time.** Negligence in preparing a bid confers no right of withdrawal after the due date/time.

Prior to the bid due date/time, requested substitutions of materials, products, or equipment specified (including manufacturer changes, trade name, model, catalogue number, patented article, etc.) will be considered when a written request is submitted on a Prior Approval Request Form, ATTACHMENT I, (complete one (1) form per substitution). The form must be submitted to the POR in accordance with the following procedures contained in the next sections of this document (PRIOR APPROVAL, TIME OF SUBMISSION, FORM OF SUBMISSION, FORM OF APPROVAL).

13. **PRIOR APPROVAL**

Substitutions may be requested by Bidder, Subcontractor, Manufacturer, or any other qualified party who proposes to use of a particular material, product, or equipment in lieu of those specified. Written submissions must clearly state the project/bid number and be directed to the POR.

14. **TIME OF SUBMISSION**

Requests for prior approval must be received by 3:00 PM, (AZ Time) eight (8) calendar days prior to the Bid Opening date in order to be considered.

15. **FORM OF SUBMISSION**

Requests for substitution approvals shall be submitted on a "Prior Approval Request Form", (ATTACHMENT I) included in this Solicitation.

- NOTE: The burden of proof and/or demonstration of merit for a particular substitution request is up to the bidder. It is the bidders responsibility to develop and establish the content of the submittal data, samples, and any other item necessary to corroborate its claim.
- Request must include sufficient basic data and the characteristics the proposed item to allow a direct comparison to be made. Knowledge and experience of the applicator may be an integral part of specification, therefore descriptive data concerning the applicator (i.e. experience, organization, references, projects, dates, etc.) may be of substance.
- Inadequate information, data, characteristics, etc. provided to the POR by the bidding vendor may be cause for rejection of the request. The POR's approval or rejection of the requested substitution is final.

16. **FORM OF APPROVAL**

Approved requests will be set forth in an addendum to be issued no later than 3:00 PM, five (5) calendar days prior to the Bid Opening Date.

17. **AFTER AWARD OF CONTRACT**

Substitutions will not be considered except when the originally approved materials or equipment is no longer available. The POR may consider a formal request for substitution under the following conditions:

- A. The request is accompanied by complete data on the proposed substitution which confirms compliance with the Contractual documents to include: Product Identification and Description, Performance/Test Data, References and Samples (when applicable). An itemized comparison of the proposed substitution must be submitted and include the products specified or named by Addenda with all data relating to Contract time schedule, design and artistic effect.
- B. The request is accompanied by accurate and complete cost data of the proposed substitution compared with the original product specified -- whether or not modification of the Contract sum is to be a consideration.
- C. When forwarded by the Contractor to the POR, requests for substitution are understood to mean that the Contractor:
 - Represents that he has thoroughly and personally investigated the proposed substitute product and then determined that the proposed substitution is equal to or better than the items originally specified;
 - Will provide the same guarantee for the substituted item that he would for that specified;
 - Certifies that the cost data presented is complete, accurate and includes all related costs under this Contract, but excludes costs under separate contracts, and that he waives all claims for additional costs relate to the substitution which subsequently becomes apparent; and
 - Will coordinate the installation of the accepted substitute and make changes as required for the work to be completed in all respects.

Substitutions will not be considered if:

- Implementation requires a substantial revision of the Contract Documents in order to accommodate usage.
- They are indicated or implied on shop drawing submissions without a prior approved formal request.
- D. Specified equipment has been clearly reviewed and approved for size/weight requirements and that space allocations have been made accordingly. Where other acceptable manufacturers are approved, their equipment is acceptable as to quality of manufacture. It is the responsibility of the Contractor to ensure that the equipment fits into the space allocated, make approved modifications to accommodate equipment other than that detailed, and ensure weights are not excessive. Contractor shall guarantee that the equipment meets all requirements of the Specifications and Drawings.
- E. The POR may require the Contractor remove from the site, material or equipment not specified. The POR may also require the Contractor to substitute satisfactory materials or equipment without delay at no added cost to the Owner. Work damaged or distributed by the change shall be the responsibility of the Contractor."

1. GENERAL DESCRIPTION OF PROJECT.

1.1 Background. The Modular building was constructed and sold in 2002. In 2005 it was relocated to the Silverbell Armory in Marana, Arizona where it served as the Operations Center for the Peace Vanguard partnership program with Singapore. Peace Vanguard has obtained a new facility; as a consequence, the modular building shall be used to house part of the 158th Infantry Battalion. The Modular building shall be relocated to 600 E. Track Rd. Florence, Arizona 85232. Please see diagram for a more specific location. The modular building measures approximately 60' X 210'. The modular building consists of 15 sections, each supported by 125 Amp service. When the "Notice to Proceed" is given the contractor shall remove the modular building within 10 days. Within 60 days the Modular Building must be relocated and fully operational

1.2 Contractor is highly encouraged to visit and inspect site prior to providing a quote. **SCHEDULED PRE-BID SITE VISIT DECEMBER 17TH AT 9:00 AM in Marana followed by a site visit to Florence at 11:30 AM.** See attached maps for location of both sites.

1.3 Additive Bid Item 1: Parking lot. Contractor shall grade site to provide a level pad for parking spaces and provide positive drainage away from building. Gravel shall be laid down and spread across in an even and uniform manner following the grade of the ground. The approximate size of the parking lot is 35,000 SF. A mixture of ¾ inch gravel, sand and fines shall be used to create the parking lot. The depth of the mixture shall be three inches. The mixture shall be compacted to bond and create a smooth surface. The parking lot shall also require concrete curb parking bumpers in front of the building and by the fence area as delineated in the provided diagram. The spacing between concrete curb parking bumpers should be approximately 8 feet.

1.4 Additive Bid Item 2: Construct a sidewalk 210 feet in length by 4 feet in width. The sidewalk shall have two ramps at each end. The side walk shall require the need to build a rain gutter to prevent possible water drainage issues. The rain gutter shall be approximately 2 feet wide and it should follow the grade of the modular building and parking lot.

1.5 Additive Bid Item 3: To repair floor and to replace carpet. The building is approximately 12600 SF. The entire building has been carpeted with the exception of the bathrooms. The type of carpet used for this project shall be textured cut pile. The color of the carpet shall be gray. The pad used shall be rated 5lbs and be at least 3/8 inch thick. Carpet shall be sprayed with M3 guard after installation.

2. TEAR DOWN

2.1 Disconnection of Utilities. The first phase of this project consists of disconnecting and capping all utilities lines. Existing water and sewer lines to be cut 2' above finished floor (AFF) and capped. The electrical service boxes adjacent to the modular building shall be disconnected and transported in order to be reused. All of the conduit and electrical wires in the exterior shall be labeled, removed and transported in order to be reused as well. The interior electrical systems shall be disconnected by module to facilitate transportation. Outlets, switches, and other electrical equipment located in the interior shall be left intact. In a similar manner all of the existing plumbing shall be labeled and disconnected, unless it can be transported without being damaged. If the connections for the modular building sewer and water lines to the city lines remain in operable conditions they shall be disconnected and transported to be used on new site. If during the utility disconnection period a component is deemed unserviceable the contractor shall provide proof by documenting and taking pictures of the item(s) in order to replace it.

2.2 Exterior Components. All of the exterior components such as ladders, ramps, stairs, skirting, water spouts, light fixtures and rain gutters shall be removed and transported to new site.

2.3 Foundation. The foundation system consists of anchors, blocking piers and wood pads. They shall be inspected, cleaned and if necessary repaired in order to be reused. If deemed unserviceable blocking piers or wood pads shall be replaced.

2.4 Roof. Contractor shall coordinate with Jim Brown Sons Roofing prior to the detachment of the modular building. Brown Roofing shall remove and reinstall the roof in order to maintain an existing warranty. They shall be responsible for cutting seams at each separation point on entire building. They shall also remove all related roofing debris from job site. Once at new location, they shall field weld new Duro-Last PVC Single-Ply drip edge clips at seams around perimeter of building to properly tie-in existing drip edge.

2.5 Building Layout. The layout of the Modular building shall be maintained for the most part. The only exceptions shall be the removal of the wall between the Crew/Dining room and the Flight line office. The Wall between Flight A Office and Flight B Office shall be removed as well. Also, the offices located within Flight A and B Officers labeled as OC shall be removed. Please see Modular Building Floor Plans for specific locations.

2.6 Safety Equipment. All of the smoke and fire alarm detectors as well as emergency exit signs shall be removed and labeled unless they can be transported without being damaged. If removed, the locations shall be labeled as well.

2.7 Cleaning. The furniture and equipment in the Modular Building shall be taken out. Any remainder furniture or equipment after the notice to proceed shall be taken out and properly disposed of by the contractor.

3. TRANSPORTATION.

3.1 Contractor shall check the condition of the frame/chassis and the axles for any degraded issues.

3.2 90% of the original tongues and axles are available for use. Tongues and axles should be inspected prior to its use. The use of rollers or other means such as cranes may be necessary to move modular buildings. The front of the Modular building is facing towards the new Peace Vanguard building. The space in between these two building is approximately 30 feet. Please see attached pictures to visualize the spacing between the buildings.

3.3 Contractor shall use special care while transporting modular building to ensure minimal damage. The use of straps and close-up film may be required to add stability and to minimize interior damage.

4. SET UP.

4.1 The Modular Building shall be put together in accordance with floor plan. The Modular building shall be connected to water, sewer, telephone, internet and electrical lines. All of the exterior components as outlined in the previous paragraphs shall be reinstalled. All phone and internet lines shall be installed by Corporate Technology Solutions (CTS). Contractor shall coordinate with CTS for installation. The point of contact is Jeff Setzke and he can be reached at 602 228 9072.

4.2 Contractor shall inspect all of the doors and windows to make sure they open and close properly.

4.3 The Modular building shall be ground set using anchors, blocking piers and wood pads.

4.4 Fire alarms and smoke detectors shall be reinstalled at their original locations. After installation equipment shall be tested.

4.5 Contractor shall direct crew to set-up interior molding, finish dry walling, and repair cracks associated with transportation of building.

4.6 The contractor shall be responsible for the care, maintenance, repair or replacement of existing improvements in the work area which have been removed or damaged during the course of construction. All repair, replacement, or cleanup shall be done to the satisfaction of the owner.

4.7 At completion of the installation, the interior of the Modular Building shall be professionally cleaned.

5. UTILITIES

5.1 Contractor shall verify horizontal and vertical locations of utilities prior to excavation or construction. The contractor shall call for Blue stake two days prior to excavation.

5.2 Contractor to verify all utility crossings prior to installation to ensure adequate coverage and separation. In the event of a utility conflict, contractor shall contact engineer for direction.

5.3 Contractor shall grade site to provide a level pad for placement of modular building and provide positive drainage away from building.

5.4 Contractor shall verify invert elevation of existing sewer line at proposed manhole location and maintain a

minimum 1 % slope to the building tie-in.

5.5 Contractor shall provide at their own expense any fittings, adapters and appurtenances needed to stub water and sewer lines to building for connection.

5.6 All electric and communications facilities (Pedestals, vaults, transformers, etc.) shall be designed and placed at the direction of the utility service provider.

5.7 Contractor shall design and build a cover for the electrical service switch located north-center section of the building. This cover shall protect the electrical service switch from the element. It should be made easy accessible for maintenance.

5.8 Contractor shall contact San Carlos Utility Company prior to construction to coordinate all electric line construction. Contractor to be responsible for all coordination regarding electric utility construction crews. The point of contact is Art Johnson and he can be reached at 520 723 6253 or 520 560 5664 Fax number 520 723 9408.

5.11 Contractor shall put in a concrete pad 8' X 8' X 18" deep on the east side of the building. This pad shall be used to set the Main Switch Box.

6. FENCE AND GATE

6.1 Approximately 315 feet of chain-link fence shall be installed as delineated in the attached diagram. The chain-link fence shall be 7 feet tall and shall be tie-in to the existing fences on the east and west sides. The depth of the holes for the installation of the terminal posts shall range from 18-24 inches. The terminal posts shall not be installed more than 10 feet apart. Contractor shall install wire ties every 5 or 6 feet along the top rail and use at least 3 ties per post in order to properly secure chain link fabric. We shall also install one 40' double slide gate as delineated in the design. Due to security reasons the gate has to be installed in one day. The use "rapid set concrete" shall have to be used.
